SUMMARY

Fresh Bachelor of Science in Information Technology graduate seeking an entry-level IT position where I can apply my skills in technical support, troubleshooting, database management, and web development. Eager to contribute to daily IT operations while continuing to develop my technical and problem-solving skills.

INTERNSHIP / OJT EXPERIENCE

College of Education – Deans’ Office Isabela State University – Ilagan Campus | February 2026 – May 2026

- Assisted faculty members with administrative and technical tasks.
- Encoded and organized office documents and records.
- Assisted with computer troubleshooting and basic technical issues.
- Prepared reports and certificates for office use.

ACADEMIC / STUDENT EXPERIENCE

IT Support / Student Developer

Isabela State University – Ilagan Campus

- Provided basic technical support and troubleshooting for computer-related issues.
- Developed a faculty document and portfolio management system as a major academic project.
- Maintained and updated MySQL databases.
- Tested web-system functionality and assisted in identifying and resolving system issues.
- Developed a simple game as part of academic programming activities.

PROJECTS

DocQTrack – Faculty Portfolio System | Major Project

- Developed a web-based document tracking and portfolio management system for faculty documents.
- Implemented role-based access for different types of users.
- Used PHP, JavaScript, HTML/CSS, MySQL, and XAMPP.
- Designed features for document submission, tracking, review, and management.

GSM-Based AC Control System Using Arduino

- An Arduino-based AC controller operated through SMS commands.
